

Ponderosa Condominiums Association, Inc.
Board Action
September 24, 2016

The Colorado Department of Health and Environment (CDPHE) requires that all potential cross connections, where non-potable or hazardous materials could enter the public water system via backflow or back-siphonage, be controlled with a suitable backflow prevention device (Colorado Primary Drinking Water Regulations 5 CCR 1002-11, section 11.37 Cross-Connection Control Rule and 11.39 Backflow Prevention and Cross Connection Rule).

To comply with this regulation, the Ponderosa Board unanimously approved the expenditure and accepted a proposal from Alpha Mechanical Solutions to install and test backflow prevention devices where required at Ponderosa Condominiums.

Members of the Board and date vote by email was received:

Bart Boatright (09/24/2016)
Joan Heinz (09/14/2016)
Kay Hutchings (09/14/2016)
Jim Peay (09/15/2016)
Beverly Ross (09/14/2016)

Respectfully submitted,

Beverly Ross
President
